DO ANAGRAMS REVEAL UFO SECRETS?

by Doug Yurchey

According to some historians, ANAGRAMS originated in the 4th Century B.C. with the Greek poet Lycophron, who used them to flatter the rich and mighty. Other sources suggest that Pythagorus, in the 6th Century B.C., used anagrams to discover philosophic meanings. Plato and his followers believed that anagrams revealed divinity and destiny.

In early Roman times, anagrams were thought to have prophetic powers. In the 16th and 17th centuries, scientists such as Galileo and mystics like Nostradamus recorded their controversial theories in anagram form (for safety reasons). The French King Louis XIII appointed Thomas Billon as his Royal Anagramist.

From the Encyclopedia Americana:

'Anagrams date from ancient times. Composing them was a favorite pastime during the Middle Ages, when a mystic connection was believed to exist between the nature or fate of a person and an anagram derived from his name.'

Today, switched-around letters are considered amusing word games and brainteasers. We have LOST what could be the true significance of anagrams. Were the ancients more aware of the deeper meanings in Life? Did they know the secret relevance of anagrams?

Thanks to the modern anagram-search-engine, 'Anagram Genius,' we can make amazing discoveries *instantly!* The following examples are excerpts from my manuscript 'The Anagram Code.' These particular ones are on the subject of UFOs, space and those involved in certain government conspiracies. Using anagrams for divining answers to historical mysteries and great unknowns is certainly not a conventional method. However, consider the following. Forgive the *fictional* references; they are sci-fi and included to demonstrate that anagrams work even for fiction. Anagrams work for other languages, Latin, Chinese and possibly the ancient hieroglyphics. Here is only the smallest preview from a potential book that will shock the readers!

Anagrams are speaking to us. Should we not, at least, LISTEN?

Zecharia Sitchin = hi, narcistic haze
aha, rich citizens
is rich, antic haze

Examine the above anagrams again and more closely. See that the letters on one side of the equal sign truly are the exact same as on the other side of the equal sign. Each column of anagrams is listed in order of the ones that make the most sense. WHY AND HOW DO THEY DO WHAT THEY DO?

After placing many thousands of subjects in the anagram-search-engine, the answers remain hard to define. Who can say what this is? 'The Anagram Code' reveals prophetic ones such as:

Princess Diana = ascend in Paris
              a car spin is end
              dies in car, snap

'Spooky' is the word for possibly an anagram-consciousness. Who is talking to us through anagrams? Is this the same as Ouija boards, tarot cards, crystal balls and tea leaves? Whatever the truth is…anagrams are an untapped source of knowledge. Imagine if the ancients played with computer search-engines.

Let us really stretch our imaginations as to attempt to answer: Where is Osama Bin Laden? First, look at his anagrams…

Osama Bin Laden = a damn alien SOB
                old man in a base
                in a mad one's lab
                so bad alien man
                bad as Lenin, Mao
                O man, bad aliens

These 13 letters, switched-around, do equal the commentary. The descriptions fit Bin Laden. Now, the Prime Minister of England,

Tony Blair, also has many accurate anagrams. They are not complimentary. Here is an interesting one:

'lay 'n orbit'

Could the reason the War on Terror continues and why we cannot find Osama Bin Laden is he is being *kept in orbit?* In orbit is the perfect place to secure someone from ever being discovered by the media and public eye.

Why do so many famous people have relatable anagrams? Why are politicians always portrayed negatively by anagrams? Why were anagrammed political organizations usually described as corrupt institutions? Can anagrams be more reliable than the federally owned media?

Everyone should explore 'Anagram Genius' and make their own discoveries. Long held questions can be answered in letters. It was a marvelous experience to find the secret significance to certain anagrams. Readers will not believe what mysteries are brought to light until they see for themselves. I feel I have found new Nostradamus quatrains or like the first person who deciphered lines from the Dead Sea Scrolls. Look for the book 'The Anagram Code.' The book will begin a new field of research, which is actually a rediscovery of an old *science.*
